

Volt Delta International
Landsberger Straße 110
80339 München
Tel: 089 455 66 0

How to find us

The Munich City Tower is situated on the south side of the Donnersbergerbrücke at Landsbergerstrasse 110. A car park situated under the bridge itself is available to our visitors.

Approaching on the ring road (Landshuter Allee) from the North:

When coming over Donnersbergerbrücke, leave the ring road by following the signs to Augsburg, Landsberg and Zentrum. Stay in the left hand lane. Take a sharp left turn into a small road under the bridge before reaching the traffic lights and you will see the car park entrances on the left hand side. Please use the second entrance.

Approaching on the ring road (Garmischer Strasse) from the South:

Leave the ring road when just coming out of the 'Trappentreu' tunnel approaching Donnersbergerbrücke by following the signs to Pasing and Stadtmitte/Zentrum. Cross straight over the Landsbergerstrasse traffic lights in the middle lane and then turn immediately left into a small road under the bridge. You will see the car park entrances on the right hand side. Please use the first entrance.

Approaching on the Landsbergerstrasse from the city center:

Take a right turn at the corner where the tower is situated, signposted for the Stuttgart and Nürnberg motorways, and then turn immediately left into a small road under the bridge. You will see the car park entrance on the right hand side. Please use the first entrance.

Approaching on the Landsbergerstrasse from Pasing/Laim (coming towards the city center):

Take a left turn at the traffic lights under Donnersbergerbrücke in the direction of the Stuttgart and Nürnberg motorways. Then turn immediately left into a small road under the bridge. You will see the car park entrances on the right hand side. Please use the first entrance.

To enter the car park, press the middle button and you will be connected to the porter who will open the barrier. Once you have parked the car, leave the car park the same way you entered. Cross over the street to the tower, go round the corner and there you will find the main entrance next to the fountain. The porter will contact Volt Delta International on the 12th floor.

How to find us using public transportation

Volt Delta International is located at the S-Bahn station Donnersbergerbrücke near the city center. All S-Bahn lines, including those from the airport, stop at Donnersbergerbrücke. Upon exiting the S-Bahn, go up the escalator, past the Müller bakery and up the stairs to street level. Turn left and cross over the bridge – the Munich City Tower will be in plain sight straight ahead of you. Enter the tower around the front at the Landsbergerstrasse entrance; the Volt Delta International reception is on the 12th floor. A downloadable PDF of the S-Bahn network in Munich can be found at:
